

CS555_P02

Somayah Alharbi

Here are some screenshots from the result:

The first screenshot shows the console output for a GEDCOM file. It lists several invalid tags and their levels, including HEAD, SOUR, WWW, FILE, DATE, DEST, GEDC, VERS, FORM, SUBM, and NOTE. The second screenshot continues the output, showing invalid tags for NAME, GIVN, SURN, _MARNM, SEX, BIRT, and another NAME tag.

```
